

Frequently asked questions

Q: Is it safe for my family, friends and pets to have contact with me during my chemotherapy treatment?

A: Yes. Socializing, sharing meals, etc. are safe, but please discuss risks from physical contact with your nurse or doctor.

Q: Can my family use the same toilet as I do?

A: Yes, as long as waste is cleaned from all surfaces and the toilet is flushed, with the lid closed, twice after each use.

Q: Is it safe to dispose of chemo in the household garbage?

A: NO. Chemotherapy waste is considered hazardous and should be sealed in a plastic bag and brought to the Cancer Centre for disposal

Q: Can I travel with my chemotherapy?

A: Yes. Traveling is not a problem unless the chemotherapy requires special storage. Check with your nurse or doctor for instructions.

For Patients Receiving Chemotherapy At Home

“Baby Bottle Chemo”

Safety Information

In this pamphlet you will learn about:

- How to protect you and your family from chemotherapy spills
- How to use the chemotherapy spill kit
- Answers to your frequently asked questions

How to protect yourself and your family from chemotherapy

Chemotherapy is a cytotoxic medication, which means that it is poisonous to cells. It is important to take precautions to protect yourself and your family.

Body Waste

- Urine, feces, vomit, blood and sperm will contain chemotherapy for several days.
- After toilet use, flush 2 times with lid closed.
- A condom should be used during sexual activity.
- Wash hands well with soap and water after contact with any body wastes.
- Clean any surfaces exposed to body waste with soap and water while wearing gloves.

Skin Care

- If chemotherapy is spilled on your skin, immediately wash the area with soap and water.
- If redness lasts more than 1 hour or irritation occurs, contact your doctor.

Eye Care

- If chemotherapy is splashed in your eyes, flush with cool water for 10 to 15 minutes and contact your doctor.

Laundry

- If clothing becomes soiled with chemotherapy, wear gloves to avoid skin contact and place items in washing machine to wash normally.
- Do not wash soiled clothing with other clothes.
- If you do not have a washing machine, place clothing in a sealed plastic bag until you are able to wash.

What to do when you have a chemotherapy spill

'Chemotherapy Spill Kit' which will allow you to safely clean up the chemotherapy if a leak or spill occurs.

If you have a chemotherapy leak or spill:

1. **Clamp your line using the clamp attached** (just pinch the clamp closed). **If you need help, call the Cancer Centre (see step 8)**
2. Open spill kit
3. Put on 2 pairs of gloves
4. Use the blue pads to absorb the chemotherapy
5. Clean the area thoroughly with soap and water 3 times using paper towel or a disposable cloth
6. Dispose of all materials, including the gloves, in a sealed, plastic bag
7. Place the biohazard sticker from the kit on the outside of the bag
8. **Call the Cancer Centre for further instructions**

- During the hours of Monday to Friday 8:00 pm to 4:00 pm, call 705-728-9090, x43565 (Chemotherapy Reception)
- After hours, call 705-728-9090, x43311 (Cancer Inpatient Unit)

9. You will need to **come to the Cancer Centre as soon as possible** so that we can check your line.
10. Store the bag in a safe area and out of the reach of children and pets.
11. Bring the bag to the Chemotherapy Unit on Level 3 for proper disposal **as soon as possible**.

You will be provided with a
